

# Your headcount doubled. Your travel process didn't keep up.

Fintech companies scale fast. Within 18 months, most UAE fintechs are managing 50+ monthly bookings across WhatsApp threads, personal cards, and direct websites — with no consolidated view for the CFO. Add regulatory travel requirements and the compliance exposure becomes real.

## WHAT IT'S COSTING YOU

- No real-time spend visibility**  
CFO discovers budget overruns at month-end, not before
- Regulatory travel poorly documented**  
Central Bank visits and DIFC meetings without audit trails
- Travellers using personal cards**  
slow reimbursement, incomplete data, no policy control
- No approval workflow**  
anyone books anything — no oversight on class or spend

## WHAT CHANGES WITH BIZAWAY

- Scales with your headcount**  
Add 20 users or 200 — no renegotiation, no re-implementation. BizAway scales at the same speed you do.
- Approval workflows built for compliance**  
Multi-level approval flows by seniority, spend threshold, or destination. Every regulatory visit documented before the trip happens.
- Real-time spend dashboard**  
Your CFO sees live travel spend by team, project, or individual — not a spreadsheet reconstructed at month-end.
- Virtual cards & BTA**  
Issue virtual cards per trip, link to your Business Travel Account, or use SEPA direct debit. No personal card expense claims.
- BizzyFlex**  
Investor meetings reschedule. Regulatory calls move. Cancel any booking up to 3 hours before — 80% refund, no penalty.
