

Your staff can be anywhere in the world. You should always know where.

Hospitals, clinics, and healthcare groups manage complex travel across clinical, administrative, and commercial functions. Doctors attend international conferences. Procurement teams visit equipment suppliers. Executive teams coordinate across multiple facilities. Healthcare organisations carry some of the strictest duty-of-care obligations in any sector — yet most manage staff travel with no real-time visibility.

WHAT IT'S COSTING YOU

- ⊗ **No real-time traveller location visibility**
duty of care failure risk in the event of an incident
- ⊗ **Conference and CME travel poorly tracked**
budget overruns and incomplete professional development records
- ⊗ **Multiple departments with different policies**
inconsistent spend and no consolidated reporting
- ⊗ **Out-of-hours emergency with no support**
staff stranded with no resolution path

WHAT CHANGES WITH BIZAWAY

- 🛡️ **Travel risk management**
A live map shows exactly where every traveller is in real time. In the event of a regional incident, you know who is where and can act immediately.
- 👤 **Department-level policies**
Clinical staff, admin, and executives each have different travel entitlements. Set policies per department, per seniority, per destination — enforced automatically.
- 📅 **Conference & CME tracking**
Tag every booking to the conference or training programme it supports. Demonstrate ROI on professional development spend and maintain compliance records.
- 🕒 **24/7 TED Support**
A surgeon's flight is cancelled the night before a critical procedure at a partner facility. TED rebooks, finds alternatives, and resolves — around the clock.
- 📄 **Consolidated invoicing by department**
One invoice per period, tagged by department, facility, or cost centre. Ready for your finance system on the first working day of the month.

Live.
