

Your team scales fast. Your travel process should too.

Tech companies move fast — and their travel reflects it. Sales teams fly to client sites. Engineers travel to implementations. Executives attend GITEX and LEAP. The result is a high volume of varied, often last-minute travel managed with personal credit cards and Booking.com. As the company scales, this breaks — and no one notices until finance has a problem.

WHAT IT'S COSTING YOU

- ⊗ Rapid headcount growth outpacing travel process**
chaos and no visibility at scale
- ⊗ Travellers booking on personal cards**
slow reimbursement, incomplete data, policy blind spots
- ⊗ No approval workflow**
anyone books anything, any class, with no oversight
- ⊗ Sales travel not tagged to accounts**
inaccurate cost-of-sale reporting and unit economics
